

## Swivel

With a smooth 360-degree swivel you can easily rotate the chair in either direction while seated.

## Cold Cure Molded Foam

Furnsit™ recliners are made with high density Cold-Cure Molded Foam Cushioning. Computer controlled 56 kg/m<sup>3</sup> (3.5lb/ft<sup>3</sup>) density foam is liquid form injected directly over the steel frame. This unique space-age technology ensures comfort, body correct support as well as durability.

## Adjustable headrest

The easily adjustable headrest functions, with an infinite number of comfort positions, providing ultimate support for your neck while reading, watching TV or resting. Some models are also equipped with Telescopic (up - down) function making it possible to move the headrest up and down.

## Lay flat reclining

Effortless reclining. Shift seating position and back rest angle by using your body weight. Reclining tension can be adjusted. The chair provides lay-flat recline position like no other in the industry.

## Comfort Tilt

Comfort Tilt option creates a subtle rocking motions that enrich the seating comfort. Comfort Tilt fine-tune the angle of chair to your body movements and provides a superb reclining function.

## 3 different sizes for perfect fit

Furnsit™ recliner available in different sizes for perfect fit. See table for the dimensions.

## Dynamic lumbar support

Anatomically correct shaped interior steel frame with high carbon sinuous springs and a patented built-in dynamic lumbar support system ensure optimal lower back support regardless of reclining position.

## Adaptive footstool

Practical and very comfortable foot and leg support. The H2 Seating footstools have a built-in function that automatically follows the movement of your legs when reclining, securing the most optimal leg support possible.

## Options:

### Different bases

We offer 6 different base options. Wood base 55, 11 and 22 are available in different wood finishes.

### Seat height

We offer the possibility to lower (2cm/0,8inch) or increase the seat height (2cm/0,8inch) across all sizes. This is done with a cylinder swivel mechanism of different heights.
